

ROCKWELL LARGE WALL HUNG BASIN

Inspired by the American trough basin in cast iron, the Rockwell wall hung basin has been replicated in ceramic. It is available in small, medium, large and double with either one or three tap holes. Available in white inside and out, white inside with a colour exterior. Shown here in the Rockwell green/Willow with corresponding Rockwell basin taps.

NB We recommend that you create a void / box behind the tap area / splashback and set the tap rough ins (valve bodies and T) on a ply board
